

Dropping Threshold System

A'line

VERSATILITY

A universal solution for doors made of PVC, wood, aluminum, and steel.

RELIABILITY

A product manufactured from high-quality materials and tested components, ensuring long-lasting, trouble-free use.

FUNCTIONALITY

Suitable for use in facilities where specific acoustic parameters are required, as well as in smoke-sealing doors.

COMFORT

Effectively reduces the ingress of pollutants, noise, light, and heat loss.

A'line

Unique product line characterized by exceptional precision in manufacturing and the materials used

Key product characteristics

TESTED QUALITIES:

- Durability: 1,000,000 cycles
- Soundproofing: up to 52 dB
- Fire resistance according to EN 1634-1 and EN1363-1 in class EI60 (model AP-AMS2420A)

CONSTRUCTION:

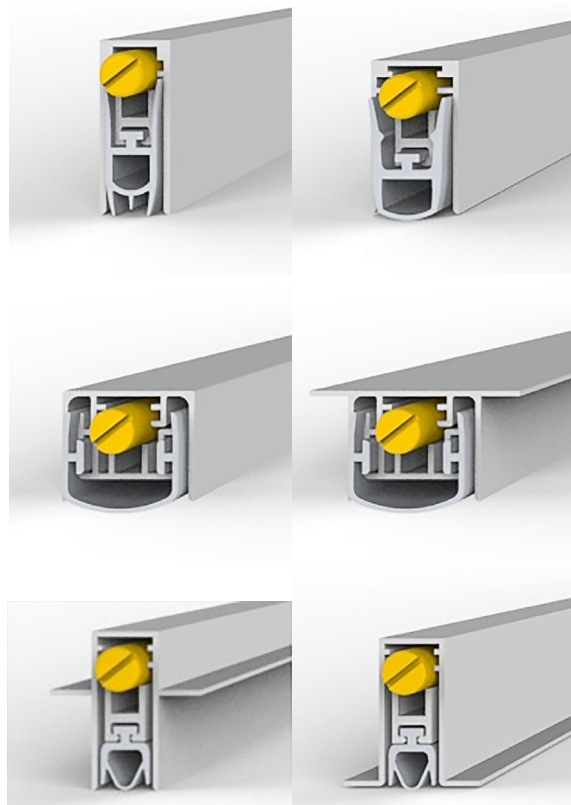

- Made of aluminum profiles with silicone seal,
- Self-leveling spring mechanism with drop adjustment up to 14 mm,

APPLICATION:

- For PVC, aluminum, wooden, and steel doors,
- For both new and existing doors,
- For exterior and interior doors,
- For soundproof and smoke-sealing doors,

AVAILABILITY:

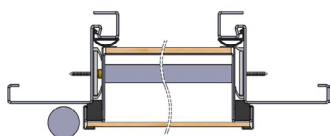

- Available lengths: from 400 to 1200 mm (standard),
- Special lengths: upon request,
- Cutting ranges every 200 mm.

Additional elements:

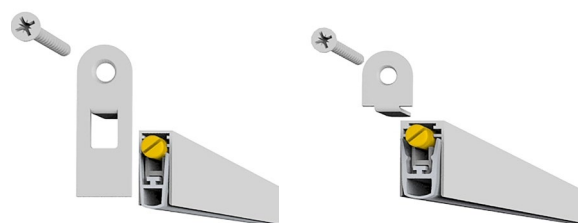

Sealing elements

Fill the side gaps between the door frame and door leaf, improving all the performance of the drop-down threshold

Mounting elements

Secure against seal dropping and provide an aesthetic finish to the threshold.
